Dimu Tours

Tour & Traveling Management System — Fully Detailed Project Report

PLATFORM **Web (PHP/MySQL)**	BACKEND **PHP 8.x (Procedural with PDO)**
VERSION **1.0.0**	DEVELOPER **Malitha Tishamal**
INSTITUTION **Customer Project**	FRONTEND **Bootstrap 5.3 & Vanilla JS**

Responsive | Admin Dashboard | AJAX Engine | May 2026

1. Project Overview

The Dimu Tour & Traveling website is a high-performance, responsive web application built for a premier tourism and taxi service provider in Sri Lanka. It replaces traditional static information with a dynamic, data-driven experience. The application features a stunning customer-facing frontend to explore tours, safaris, and vehicle options, paired with a robust administrative dashboard for comprehensive business management. By integrating real-time lead generation via WhatsApp and an asynchronous booking system, the platform ensures maximum conversion and operational efficiency.

2. Technology Stack & Dependencies

Category	Technology / Tool	Purpose
Server Environment	WAMP Server	Local hosting environment for Apache, PHP, and MySQL
Backend Language	PHP 8.2	Core server-side processing engine
Database	MySQL (MariaDB)	Relational database for tours, vehicles, and inquiries
DB Access	PDO (PHP Data Objects)	Secure, object-oriented database abstraction with prepared statements
UI Framework	Bootstrap 5.3.0	Responsive mobile-first grid system and UI components
Icons	FontAwesome 6.4.0	Vector icons for visual enhancement
Styling	Vanilla CSS3	Custom glassmorphism, animations, and branding
Client-side Logic	Vanilla JavaScript	AJAX handling via Fetch API and DOM manipulation
Communication	WhatsApp API	Direct lead redirection to the client's business number

Authentication	PHP Sessions	Secure admin session management with BCRYPT hashing

3. App Architecture Breakdown

```
Dimu Tours/
├── index.php                    ← Primary Customer Landing Page
├── booking.php                  ← Asynchronous Booking Processor
├── review.php                   ← Asynchronous Review Submission
├── includes/                    ← Shared Frontend Components
│   ├── db.php                   ← Central PDO Database Connection
│   ├── header.php               ← Navigation & SEO Meta
│   └── footer.php               ← Site Credits & JS Initialization
├── admin/                       ← Management Dashboard Module
│   ├── dashboard.php            ← Business Overview Statistics
│   ├── tours.php                ← Tour Package CRUD
│   ├── vehicles.php             ← Fleet & Gallery Manager
│   ├── reviews.php              ← Feedback Moderation Engine
│   └── includes/                ← Admin Specific Shared Components
├── assets/                      ← Static CSS, JS, and Static Imagery
└── uploads/                     ← Central Storage for User/Admin Media
```

4. Frontend Module Detailed View

4.1 index.php (The Hub)

The primary entry point. It dynamically orchestrates the loading of all business content from the database. It features a hero slider, tour cards, safari highlights, vehicle galleries, and the travel memory blog.

Logic Block	Description
Hero Slider Query	Fetches all active hero slides from `hero_slides` table to populate the top banner.
Tour Card Fetch	Retrieves active tour packages, including their day-by-day itineraries for modal display.
Vehicle Fleet Query	Pulls vehicle specs and links to the `vehicle_images` table for the gallery.
AJAX Integration	Initializes Fetch API listeners for the booking and review forms to prevent page reloads.

4.2 booking.php

A headless PHP script designed to process incoming customer leads asynchronously. It ensures data integrity and triggers the communication pipeline.

Logic Block	Description
Input Sanitization	Trims and filters all incoming POST data to prevent malicious injections.
Lead Capture	Inserts the inquiry details into the `bookings` table for long-term tracking.
WhatsApp Link Generator	Dynamically constructs a pre-filled WhatsApp URL and returns it in the JSON response.

5. Admin Module Detailed View (lib/admin/)

5.1 dashboard.php

Provides a real-time snapshot of the business operations. It calculates key metrics from across the database.

Statistic	Source Calculation

Total Tours	`SELECT COUNT(*) FROM tours`
Total Bookings	`SELECT COUNT(*) FROM bookings`
Total Reviews	`SELECT COUNT(*) FROM reviews`
Active Vehicles	`SELECT COUNT(*) FROM vehicles WHERE status='active'`

5.2 tours.php

The core content management script for tour packages. It handles complex data entry and media management.

Function / Logic	Description
_addTour()	Handles the multipart form data, validates the image upload, and generates a new record.
_editTour()	Allows modification of titles, descriptions, and durations with optional image replacement.
_toggleStatus()	Instantly publishes or unpublishes a tour from the frontend using a single SQL update.
_deleteTour()	Removes the tour record and any associated itinerary days from the system.

5.3 tour_itinerary.php

A specialized sub-manager for the day-by-day breakdown of tours, providing high-resolution details to potential customers.

Function / Logic	Description
_addDay()	Links a specific itinerary day to a parent tour ID.
_reorderDays()	Allows admins to adjust the sequence of events within a tour package.

6. Database Schema Detailed View

Table Name	Purpose	Key Columns
`site_settings`	Global business configuration	key_name, value
`tours`	Master tour package data	id, title, duration, image, status
`tour_days`	Day-wise itinerary (1-to-Many)	id, tour_id, day_number, title, description
`vehicles`	Transportation fleet specs	id, name, pax_count, icon_class, status
`vehicle_images`	Multi-image storage for vehicles	id, vehicle_id, image_path
`reviews`	Customer feedback moderation	id, name, rating, message, status
`travel_memories`	Blogging and past event gallery	id, title, location, event_date, status
`admins`	Secured access credentials	id, username, password (BCRYPT)

7. Feature Completeness Summary

Feature	Public Visitor Experience	Administrator Management
Authentication	❌ None required	✅ Secure Session-based Login
Tour Browsing	✅ View Details & Itineraries	✅ Add, Edit, Delete, Toggle
Vehicle Fleet	✅ Explore Gallery & Capacity	✅ Manage Fleet & Multi-Image Upload

Booking System	✅ AJAX Submit & WhatsApp Redirect	✅ Review Booking Logs
Review System	✅ Submit Review (Pending)	✅ Moderate, Approve, Edit Feedback
Contact & Maps	✅ Interactive Google Maps	✅ Edit Global Contact Details
Site Content	✅ Real-time Updates	✅ Full Hero Slider & Text Control

8. Client Success & Feedback

"Hi Malitha, I just wanted to take a moment to sincerely thank you for the amazing work you did on my website for Dimu Tour & Travel. You understood exactly what I needed and delivered it in a very attractive and professional way, and that too in such a short time. I truly appreciate your creativity, effort, and dedication. The website looks exactly how I imagined it – even better!"
